

Weekly Report

Period: 2017/3/13-2016/3/19

Reporter: Li Zongzhuang

Done

1. This week, firstly I use VMmare to make the deeplearning ,but it can't make complex programs. So I have to install ubuntu as before. The network can't work just like the last week. At last, I found a method to defense it. That is using the cellphone share the net to computer. It works well. Then, I install cuda, cudnn and tensorflow for GPU. And I also make the simple program well.
2. The second thing is I read the paper, which is given by Teacher Hao, Then I come to build the framework to make it. It's challenged and I didn't make it in this moment.
3. I finished the share of the paper about transfer learning well, and have a communication with other teachers and schoolfellows.
4. I also make my homework which asked for the classes.

To do

1. I should to make a program about deeplearning on medical images as fast as I can. Now, I have make the framework well. Although the computer hardwares aren't good, the simple program will can be made.
2. Then the task which Teacher Hao gives me, I have r a part of the paper, then I will read the code about the paper.
